

MATTHEW NWACHUKWU UTTI

B.sc Mathematics and Computer Science

Email: matthewutti@outlook.com

Phone number: +234 806 538 4549

Github: github.com/fredie7

A great team player with sound communication skills, efficient writing skills plus a complementary mathematics and coding proficiency. My fast learning ability also aids my working under little or no supervision, coupled with a remarkable leadership epitome which facilitates my penchant for being an integral part of a project or organization, thereby meeting up with and surpassing team goals and aspirations

Education:

2014 – 2020 National Open University of Nigeria
B.sc Mathematics & Computer Science

Research experience:

Project Thesis:
Application of Linear Programming in Profit Maximization.
Method:
I observed certain decision variables – say “n” choice variables and “m” constraints whilst defining my objective functions and took cognitive data of corresponding constraints which represented a set of conditions which my end conclusion had to justify, such as available technical coefficient, skilled labour, production and raw materials, as I simultaneously iterated through the first and subsequent solutions, until I got through to the optimum solution. I also factored-in marginal cost -marginal revenue and total-cost – total revenue methods in weighing up maximization in consonance with consumer sentiment.

Presentations:

Seminar presentation at the National Open University of Nigeria:
Theme: Internet of Things.

Skills:

Data collection, cleaning and wrangling,
Exploratory analysis & visualization
Critical thinking
Mathematics & Logic,
Microsoft Excel,
Version Control,
Data Analysis,
Web Development

Programming Proficiency:

Python (including numpy, pandas and matplotlib)
JavaScript Stack
SQL

Work Experience:

2014 – 2017 Freelance Private Tutor
Mathematics & Sciences

2017 Grandrey International Computer Networks, Lagos, Nigeria.
Internship: Front-end web development.

2018 – 2019 Yiminde global limited, Lagos, Nigeria
Data & Business analyst

2019 - 2021 Terimaid Limited, Lagos, Nigeria.
Full stack Web Developer.
